

Universal A-GPS Locator Quick Start Guide

Account Activation

1 Getting Started

- Power on your Zoombak™ Locator and use the AC Wall Charger to fully charge before starting the activation process (Note: the initial charging time is about 6 hours)
- Locate the Device ID number on the bottom of the package (see right)
- Have a credit card available
- Place your Locator outside or near a window before starting the activation process

2 Create Your Zoombak Account

- Go to zoombak.com and click on "Activate" in the top navigation bar
- Log in to your account or, if you are a new customer, create a login profile for your account by entering a username, password, PIN and secret security question
- Enter your Locator Device ID number and give your Locator a unique name

3 Enter Your Billing Information

- Select a payment plan
- Enter your contact and credit card information
- Account activation is complete

Activation and use of the Zoombak Universal A-GPS Locator are subject to Zoombak's customer agreement, plans, terms and conditions, which can be found at www.zoombak.com.

Using Your Locator

1 Using Your Locator

- Go to zoombak.com and click on "Locate" in the top navigation bar
- Enter your username and password to log in to your account

2 Try Out Your Locator

- Place your Locator outside or near a window to test for the first time prior to use
- Click on the "connect" button to connect your Locator to the network for the first time
- Once your Locator is connected, click on the "find now" button to locate your device (Note: It may take up to 60 seconds to locate your device)
- You can click on the help icons featured throughout the application for additional information on using each service feature

3 Monitoring Your Locator

- Set up email and mobile phone alerts to notify you when your Locator battery is low or if your Locator has been turned off
- Select how you would like to be notified (email, text message or both), making sure to check the appropriate notification alert box
- Enter a name and mobile phone number or email address and click on the "add" button for each notification alert
- Click the "save" button at the bottom right of the screen to save all of your alert notifications

Zoombak services are dependent on your Locator's ability to acquire satellite signals and wireless network coverage. See www.zoombak.com for coverage map and details.

Setting Up Your Safety Zones

1 Setting Up Your Safety Zones

- Under "My Zones" click on the "create new" button
- Name your safety zone
- Click on the "device location" tab to set up a zone around your Locator's current or last known location, or manually enter an address where you would like to base your zone

2 Create Your Safety Zone Boundary

- Select a boundary or create a customized boundary for your safety zone
- A safety zone boundary can be set up for a radius as small as 110 yards (1/8 mile) and as large as a 1/2 mile

3 Create Your Safety Zone Schedules and Alerts

- Select your Locator
- Create a daily or extended schedule for your safety zone and click the "create new" button
- Customize the alerts by selecting the notifications you want to receive (when your Zoombak leaves a zone, enters a zone or both)
- Select how you would like to be notified (email, text message or both), making sure to "add" each option by clicking on the appropriate button
- Click the "save" button at the bottom right of the screen to save all of your schedules and alert notifications
